SKILLS

Technologies: C#, .Net, JavaScript, TypeScript, Reactjs, React Native, Nextjs, Nestjs, Bubble, Nodejs/Expressjs, Ruby, RubyOnRails, CSS, Sass/SCSS, Tailwind CSS, Chakra UI, Shadcn, Material UI, Hubspot, Hotjar, PostgreSQL, MySQL, MSSQL, NoSQL, MongoDB, Redux, Redis, Docker, Kubernetes, GraphQL, NLP, AI integration, AWS Services, Azure App Services, Azure DevOps, RabbitMQ, Microservices Architecture, Unit Test, Integration Test, End-to-End Test, Automated Testing, Performance Optimization, Scrum, Agile development, Enzymes, RSpec, Jest, Git and GitHub

Soft Skills: Effective Communication, Team player, Time Management, Organization skills, Remote development, Leadership skills, Mentorship skills

EXPERIENCE

Peekpile	Fullstack Engineer	January 2024 - Present
• Built a full-stack mobile application for selling parcels and delivering parcels • I integrated with payment platforms like Paystack, Google Place API, Google Maps, and other third-party services • The application has thousands of users on the first release of MVP • Integrated with NLP to calculate the time estimate for delivery to a customer's address		
Ynvgroup	Software Engineer	August 2022 - January 2024
• Double the number of customers for Every by implementing localisation • Develop an Application that allows the business to track Engineering billable hours and performance • Implement a Blueprint for all Frontend projects to improve code quality and enforce conventions • Implement an application that evaluates the performance of Engineers • Design and Develop applications for leaves, absences and overtime requests		
Tek Experts	Azure Cloud Support Engineer Onsite	August 2021 - August 2022
• Assist Microsoft Customers in Troubleshooting Cloud Issues • Achieve medal of a 5-star hero • Resolve 1000+ tickets independently • Trained and mentored 12+ new engineers who are contributing significantly to the Team		
Save-On-Dev	Software Engineer (Remote Contract)	January 2020 - August 2021
• Design and Architecture planning • Built Graph API that had 10,000+ users in the first month of its release • Optimize performance for the Front-end that converts 90% of visitors to customers • Fix bugs on the backend that reduced the number of tickets we received by 50%		

Freelance	Software Developer	November 2018 - December 2020
- Interface with customers to understand their business requirements - Design and Implement a Result System that reduced the use of pen and paper by 90% - Provide solutions that reduce the errors involved in result preparation by 99% - Design and implement a transport management system which reduced the queue in a booking by 95%		

PROJECT

Would you Rather?

- A front-end web application that lets users play would you rather? game
- Build Tool: React, TypeScript, Redux, Scss/Sass, AWS S3(for deployment)

Graph API (B2B)

- A web application that structures user data in a presentable and understandable format
- It allows users to embed the Graph generated into their website
- Build Tool: React, TypeScript, Nodejs/Express, MongoDB, HighCharts Library, AWS [S3, Lambda, SES, Serverless], Node-Sass, jest

PostSpot

- A web lifestyle application that allows users to create, read, update and delete an article, also ranks articles by vote
- Build Tool: RubyOnRails, Scss/Sass PostgreSQL, AWS S3, Rspec

Geo-Search

- A front-end web application that can be used to search for weather and map information of a location
- Allows users to share weather and map information on social media
- Build Tool: Vanilla JavaScript(ES6), CSS3, Google Map API, Google Cloud Platform, OpenWeatherMap API

EDUCATION

Udacity Nano degree, Remote	React Nano degree	September 2021 - December 2021
Microverse, Remote	Software Engineering	April 2020 - December 2020
Federal University Of Technology, Minna, Nigeria	Computer Science	September 2013 - October 2018
